ABOUT THE MOTORCYCLE BLUETOOTH COMMUNICATION SYSTEM WITH MESH INTERCOM

1.1 **Key Features**

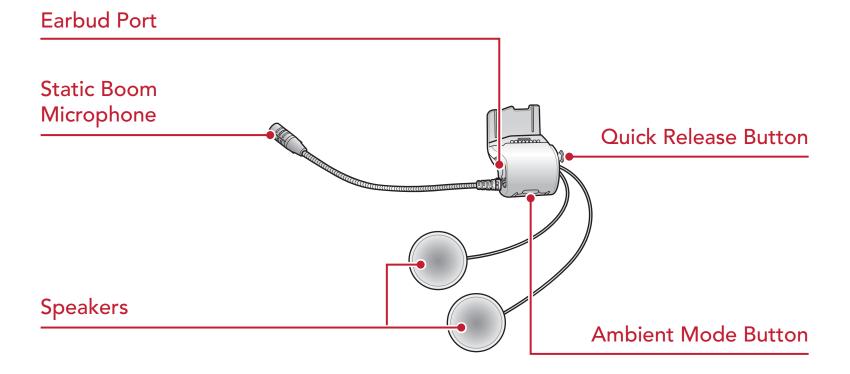

- Mesh Intercom 3.0 delivers improved sound quality, a more robust connection, and extended talk time
- Dual version Mesh Mesh 2.0 for backward compatibility
- Wave Intercom Compatible
- Multi-Way Intercom
- Audio Multitasking™
- Multi-Language Voice Command
- Support Siri and Google Assistant
- Fast Charging
- Bluetooth version 5.0

1.2 Product Details

1.2.1 Headset Main Unit

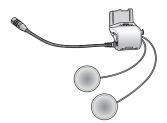

1.2.2 Universal Clamp Kit

1.3 **Package Contents**

Headset Main Unit

Universal Helmet Clamp

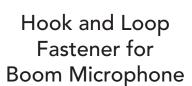

Wired Boom Microphone

Wired Microphone

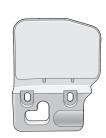

Hook and Loop Fastener for Wired Microphone

Microphone **Sponges**

Glued Surface Mounting Adapter

Speaker Pads

Hook and Loop Fasteners for **Speakers**

Boom Microphone Holder

Hook and Loop Fastener for Holder

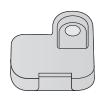

Rubber Pads

Allen Wrench

Speaker **Port Cover**

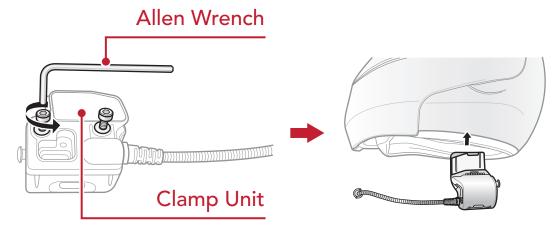

WiFi Charging Cable

INSTALLING THE HEADSET ON YOUR HELMET

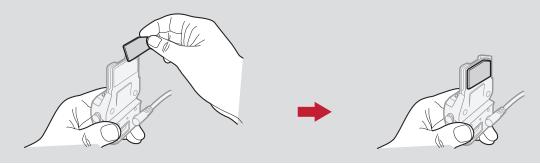

2.1 **Helmet Installation**

To securely install the headset on the helmet, please follow this procedure.

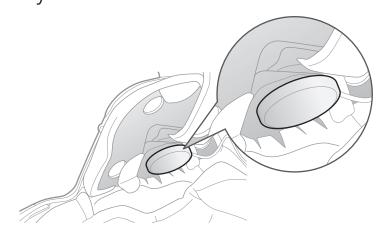

1. Insert the back plate of the clamp unit between the internal padding and the external shell of the helmet, and tighten the two screws.

Note: Depending on the size and shape of your helmet, you may need to change the thickness of the rubber pad between the clamp plates using the two extra rubber pads in the box. To increase the overall thickness, attach the thinner one to the original rubber pad or replace the original rubber pad with the thicker one.

2. Place the helmet speakers along with the hook and loop fasteners, centered to your ear, in the ear pockets of the helmet. If the helmet has deep ear pockets, you can use the speaker pads to place the speakers closer to your ears.

Note: Make sure that the microphone is located properly close to your mouth when you wear the helmet.

3. Attach the headset main unit to the clamp unit. Slide the main unit down onto the clamp unit until it clicks firmly into the bottom portion of the clamp unit.

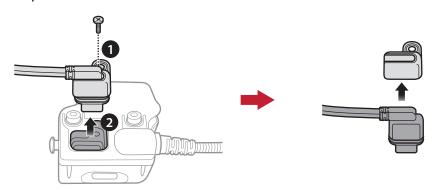

4. To remove the main unit from the clamp unit, press the Quick Release Button to slide it off the clamp unit.

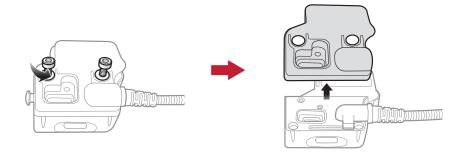

2.2 Using the Glued Surface Mounting Adapter

If you have any problem equipping the clamp unit on the helmet for any reason, you may use the glued surface mounting adapter to attach the clamp unit on the external surface of the helmet.

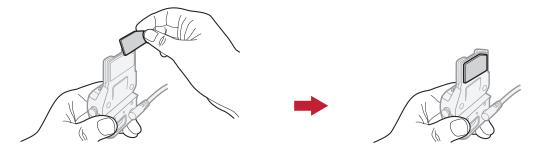

1. Remove the speaker unit.

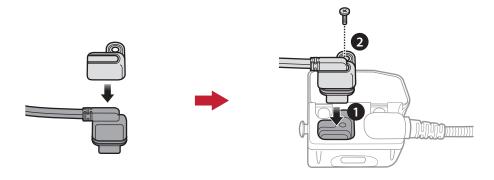

2. Remove the back plate.

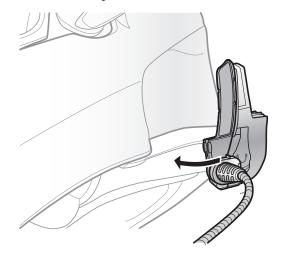

3. Remove the rubber pad and replace it with the thicker rubber pad included in the package.

- 4. Hook on the adapter to the clamp unit then screw in the glued external adapter to the clamp unit.
- 5. Reconnect the speaker cable to the speaker port.

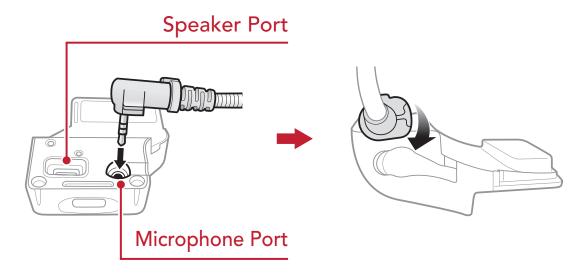

- 6. Locate a proper surface on the helmet to attach the unit then clean the helmet surface location with a moistened towel and allow it to dry thoroughly.
- 7. Peel off the cover of the adhesive tape of the adapter and attach the unit on the proper surface of your helmet.

2.3 Switching the Microphone

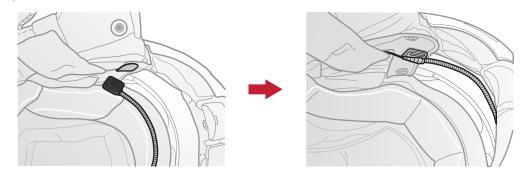

If you want to use a different microphone instead of the static boom microphone, please refer to the following steps.

- 1. Remove the back plate of the clamp unit.
- 2. Connect the microphone according to your helmet type.
- 3. Lock the microphone to the clamp.
- 4. Reattach the back plate to cover the microphone and the speaker port.

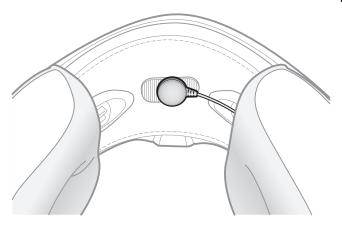

2.3.1 Wired Boom Microphone

When installing the included wired boom microphone, place the hook and loop fastener at the end of the boom microphone between the internal helmet cheek pad and the internal wall of the helmet shell. The boom microphone should be mounted so it is facing close to your mouth when you wear the helmet.

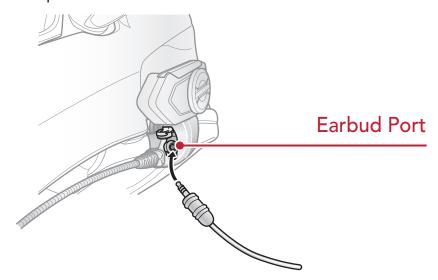

2.3.2 Wired Microphone

In case of the wired microphone, attach the enclosed hook and loop fastener for the wired microphone to the inside of the chin guard for full-face helmets. Place the wired microphone on the hook and loop fastener and connect it to the connector of the clamp unit.

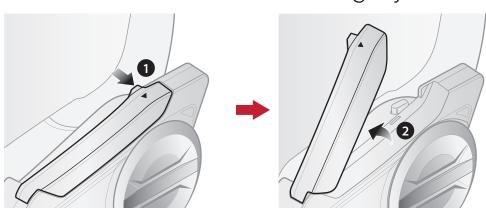

2.4 Earbuds

You can connect your earbuds to the clamp while having the speakers connected to the clamp. The sound of the earbuds will be active while the sound of the outer speakers becomes inactive.

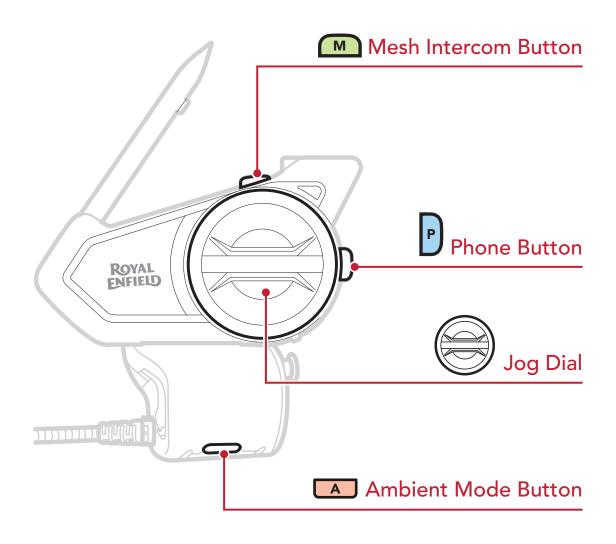

External Mesh Intercom Antenna 2.5

Pull the **Mesh Intercom** Antenna outwards slightly to unfold it.

BASIC OPERATION

3.1 **Button**

3.2 Legend

Tap Button/Jog Dial the specified number of times

Press and Hold Button/Jog Dial for the specified amount of time

Rotate Jog Dial clockwise (right) or counterclockwise (left).

Rotate while Pressing Jog Dial clockwise (right) or counterclockwise (left).

"Hello"

Audible prompt

Powering On and Off

Press and hold the Jog Dial and Phone Button at the same time to turn the headset on or off.

Powering On

Powering Off

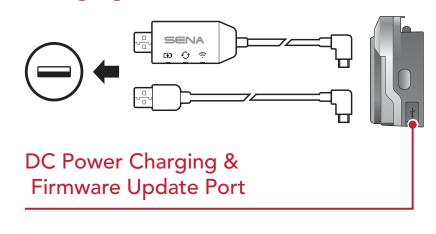

3.4 Charging

Charging the Headset

You can charge the headset by connecting the WiFi Charging Cable or a USB Power & Data Cable (USB-C).

A USB Power & Data Cable (USB-C) is not included in the package.

The headset will be fully charged in about 2.5 hours. (The charging time may vary depending on the charging method.)

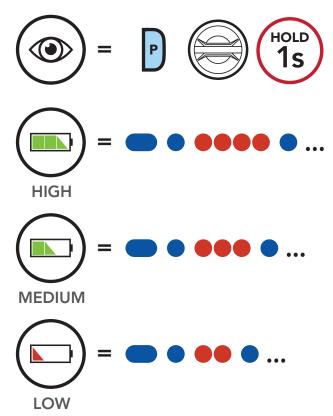

Note:

- The headset includes a Fast Charging feature which allows it to charge quickly over a short period of time. For example, a user can get up to 2.0 hours of Mesh communication or 2.0 hours of Bluetooth intercom after charging the headset for 20 minutes.
- Any 3rd party USB charger can be used with Sena products if the charger is approved by either the FCC, CE, IC, or other locally approved agencies.
- Use of a non-approved charger may cause fire, explosion, leakage, and other hazards which may also reduce the life time or performance of the battery.

Checking the Battery Level

Instructions are for when powering the headset on.

Visual Method

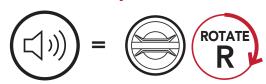

Note: When the battery is low while in use, you will hear a voice prompt saying "Low battery."

3.6 Volume Adjustment

You can raise or lower the volume by rotating the Jog Dial clockwise or counterclockwise. Volume is set and maintained independently at different levels for each audio source (i.e., phone, intercom), even when the headset is rebooted.

Volume Up

Volume Down

PAIRING THE HEADSET WITH OTHER **BLUETOOTH DEVICES**

When using the headset with other Bluetooth devices for the first time, they will need to be "paired." This enables them to recognize and communicate with one another whenever they are within range.

The headset can pair with multiple Bluetooth devices such as a mobile phone or GPS via Mobile Phone Pairing, Second Mobile Phone Pairing and GPS Pairing. The headset can also be paired with up to three other Sena headsets.

Pairs with up to Three Sena Headsets

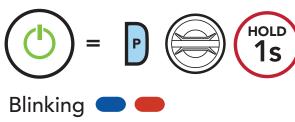

4.1 **Phone Pairing**

There are three ways to pair the phone.

4.1.1 Initially Pairing the 50S

The headset will automatically enter the phone pairing mode when you initially turn on the headset or in the following situation:

- Rebooting after executing Factory Reset; or
- Rebooting after executing Delete All Pairings.
- 1. Press and hold the **Phone Button** and the **Jog Dial** for **1 second**.

"Phone pairing"

2. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

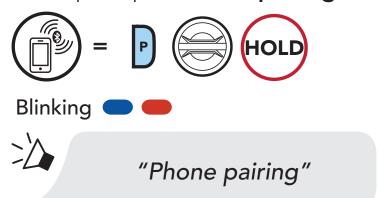

Note:

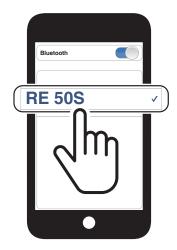

- The phone pairing mode lasts for **3 minutes**.
- To cancel phone pairing, tap the Phone Button or the Jog Dial.

4.1.2 Pairing When the 50S is Turned Off

1. While the headset is off, press and hold the Phone Button and the Jog Dial until the LED flashes red and blue alternately and you hear a voice prompt, "Phone pairing."

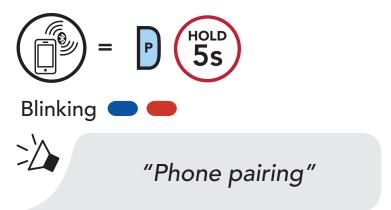

2. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

4.1.3 Pairing When the 50S is Turned On

1. While the headset is on, press and hold the **Phone Button** for 5 seconds.

2. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

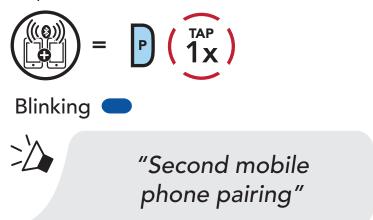

4.2 Second Mobile Phone Pairing

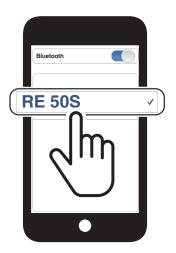

1. Press and hold the **Jog Dial** for **5 seconds**.

2. Tap the **Phone Button**.

3. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

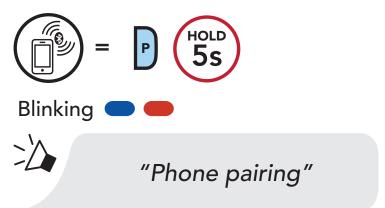

Advanced Selective Pairing: Hands-Free or A2DP Stereo

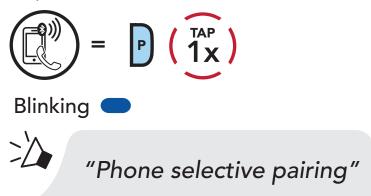

Phone Pairing allows the headset to establish two Bluetooth profiles: Hands-Free or A2DP Stereo. Advanced Selective Pairing allows the headset to separate the profiles to enable connection with two devices.

4.3.1 Phone Selective Pairing - Hands-Free Profile

1. Press and hold the **Phone Button** for **5 seconds**.

2. Tap the **Phone Button**.

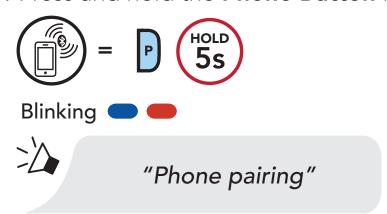

3. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

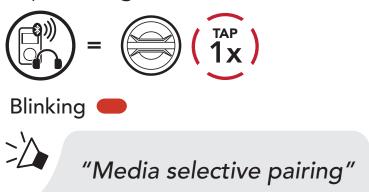

4.3.2 Media Selective Pairing - A2DP Profile

1. Press and hold the **Phone Button** for **5 seconds**.

2. Tap the **Jog Dial**.

3. Select **RE 50S** in the list of Bluetooth devices detected. If your mobile phone asks for a PIN, enter 0000.

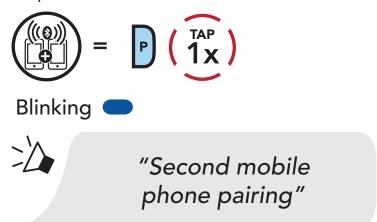

4.4 GPS Pairing

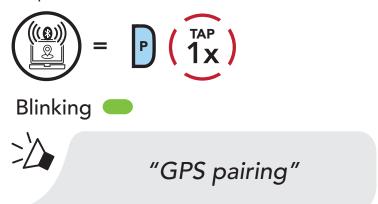

1. Press and hold the **Jog Dial** for **5 seconds**.

2. Tap the **Phone Button**.

3. Tap the **Phone Button**.

4. Select **RE 50S** in the list of devices detected. If your Bluetooth device asks for a PIN, enter 0000.

MOBILE PHONE USAGE 5.

5.1 **Making and Answering Calls**

Answer a Call

End a Call

5.2 Siri and Google Assistant

The 50S supports the Siri and Google Assistant access directly.

You can activate the Siri or Google Assistant using the voice through the headset's microphone, a wake word will be used. This is a word or a group of words such as "Hey Siri" or "Hey Google."

Activate the Siri or Google Assistant Installed on Your Smartphone

"Hey Google" or "Hey Siri"

or

5.3 Speed Dialing

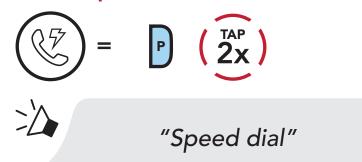

5.3.1 Assigning Speed Dial Presets

Speed Dial Presets could be assigned in the settings menu, accessible through Royal Enfield Device Manager or Sena Motorcycles App.

5.3.2 Using Speed Dial Presets

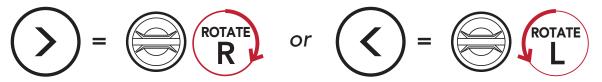

1. Enter into the **Speed Dial** menu.

Enter Speed Dial Mode

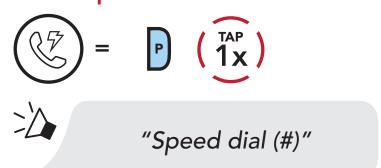

2. Navigate between the **Speed Dial Preset**.

Navigate Forward or Backward through Speed Dial Preset Numbers

3. Call one of your **Speed Dial Presets**.

Call a Speed Dial Preset Number

4. Redial the last number called.

Redial Last Number

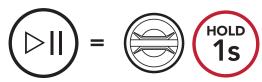

"Last number redial"

6. STEREO MUSIC

6.1 Playing Music with Bluetooth Devices

1. Play or pause music.

Play/Pause Music

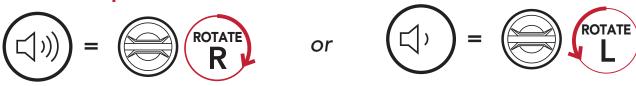

"[Beep, Beep]"

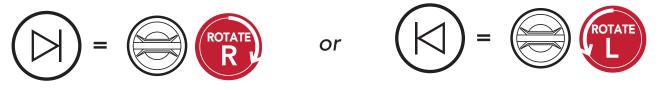

2. Adjust the volume.

Volume Up/Down

3. Track forward or back.

Track Forward/Backward

6.2 Music Sharing

You can start sharing music with one intercom friend using Bluetooth stereo music during a two-way intercom conversation and one participant of a Mesh. Both you and your intercom friend can remotely control music playback such as track forward and track back. If you start sharing music while Bluetooth intercom and Mesh Intercom are running at the same time, then music shared during Bluetooth intercom will take priority over music shared during Mesh Intercom. The Creator will send a request message to a headset connected during Mesh Intercom and will share music with the first participant that accepts the request.

Start/Terminate Bluetooth Intercom Music Sharing

"Music sharing on", "Music sharing off"

Mesh Intercom Music Sharing [Creator]

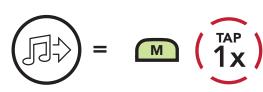

"Music sharing on"

[Participant]

"Would you like to accept music sharing?"

MESH INTERCOM 7.

What is Mesh Intercom? 7.1

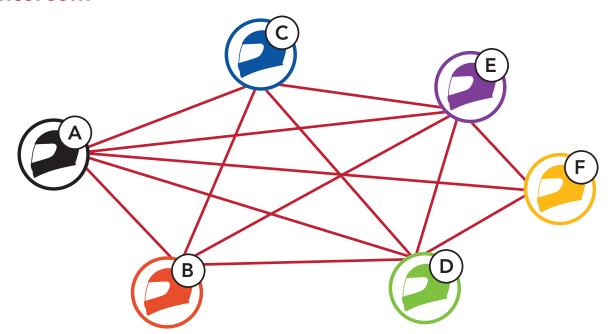

Mesh Intercom is a dynamic communication system created by Sena that provides instant and effortless bike-to-bike communication without a pre-grouping process. Mesh Intercom allows users to connect and communicate with nearby users without the need to pair each headset together.

The working distance between each 50S in Mesh Intercom can be up to 2 km (1.2 miles) in open terrain. In open terrain, the **Mesh** can be extended up to 8 km (5 miles) between a minimum of six users.

Users can communicate in two modes:

- Open Mesh™ for open group intercom conversations.
- Group Mesh[™] for private group intercom conversations.

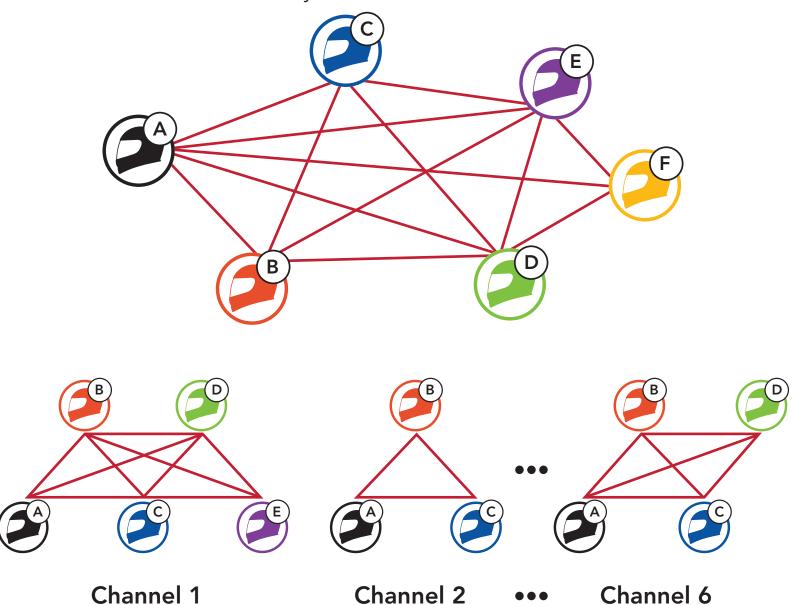

Mesh Intercom

7.1.1 Open Mesh

Open Mesh is an open group intercom function. Users can freely communicate with each other in the same Open Mesh channel and select which channel (1-6) to use through the headset.

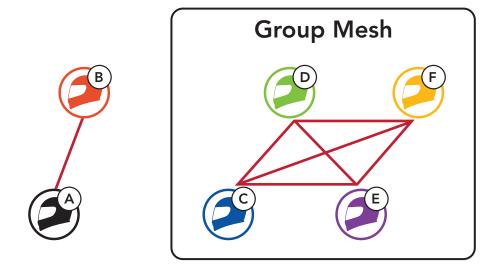

It can connect with a virtually unlimited number of users in each channel.

7.1.2 Group Mesh

Group Mesh is a closed group intercom function that allows users to join, leave, or rejoin a group intercom conversation without pairing each headset. Users can freely communicate with each other in the same private group in Group Mesh.

For closed intercom conversations using Mesh Intercom, a Group Mesh needs to be created by the users. When users create a private group in Group Mesh by Mesh Grouping, the headset automatically switches from Open Mesh to Group Mesh. Up to 24 users can all be connected in each private group.

Mesh Version Switch 7.2

Switch to Mesh 2.0 for Backward Compatibility

Mesh 3.0 is the latest Mesh Intercom technology, but to communicate with legacy products using Mesh 2.0, please switch to Mesh 2.0 using the Sena Motorcycles App.

Starting Mesh Intercom

When Mesh Intercom is enabled, the 50S will automatically connect to nearby 50S users and allow them to talk to each other.

"Mesh intercom on"

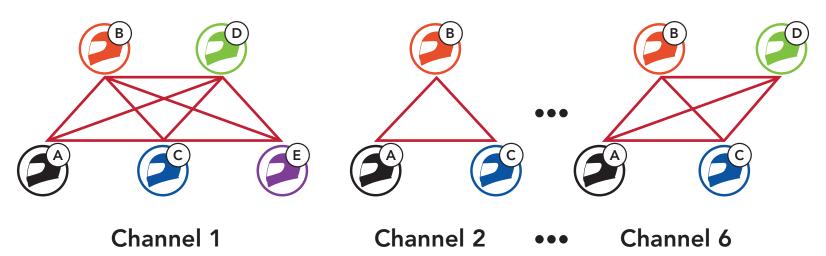

"Mesh intercom off"

Using the Mesh in Open Mesh 7.4

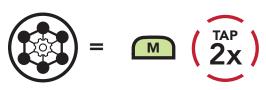

When Mesh Intercom is enabled, the headset will be in Open Mesh (default: channel 1) initially.

7.4.1 Channel Setting (Default: channel 1)

If the **Open Mesh** communication experiences interference because other groups are also using channel 1 (default), change the channel. You can select from channels 1 to 6.

Enter into the Channel Setting

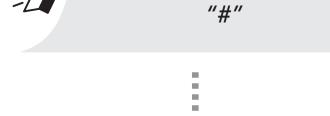

"Channel setting, 1"

Navigate Between Channels

 $(1 \rightarrow 2 \rightarrow \bullet \bullet \bullet \rightarrow 6 \rightarrow Exit \rightarrow 1 \rightarrow \bullet \bullet \bullet)$

Save the Channel

"Channel is set, channel #"

Note:

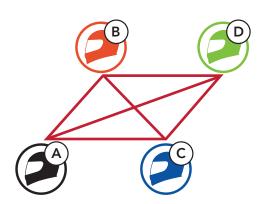

- Channel Setting always starts with channel 1.
- If you do not press any button for approximately 10 seconds in a specific channel, the channel is automatically saved.
- If you want to cancel during Channel Setting, tap the Phone Button.
- The channel will be remembered even if you turn off the **50S**.

7.5 **Using Mesh in Group Mesh**

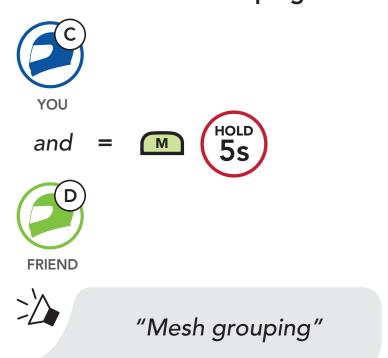

7.5.1 Creating a Group Mesh

Creating a Group Mesh requires two or more Open Mesh users.

1. Enter into **Mesh Grouping** to create a **Group Mesh**.

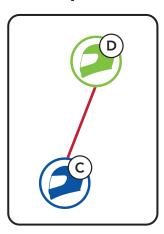

2. The headsets complete **Mesh Grouping** and automatically switch from Open Mesh to Group Mesh.

"Group Mesh"

Open Mesh **Group Mesh**

Note:

- If the Mesh Grouping is not completed within 30 seconds, users will hear a voice prompt, "Grouping failed."
- If you want to cancel during the Mesh Grouping, tap the Mesh Intercom Button or the Phone Button.

7.5.2 Joining an Existing Group Mesh

One of the members in an Existing Group Mesh can allow new members in Open Mesh to join the Existing Group Mesh.

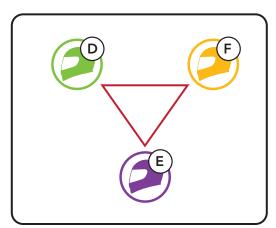

New Members

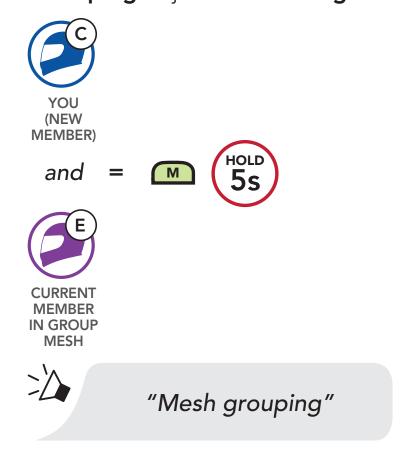

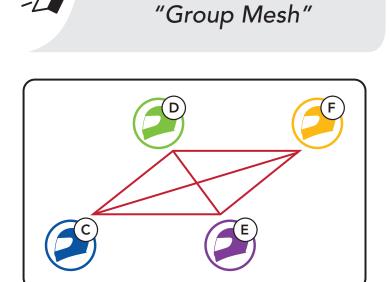

Existing Group Mesh and Current Members

1. One of the current members and a new member enter into Mesh Grouping to join the Existing Group Mesh.

2. The headsets complete **Mesh Grouping**. The new members will hear a voice prompt as their headsets automatically switch from Open Mesh to Group Mesh.

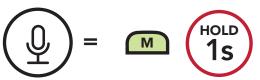

Note: If the Mesh Grouping is not completed within 30 seconds, the current members will hear low-toned double beeps and the new member will hear a voice prompt, "Grouping failed."

Enable/Disable Mic (Default: Enable) 7.6

Users can enable/disable the microphone when communicating in a Mesh Intercom.

Enable/Disable the Microphone

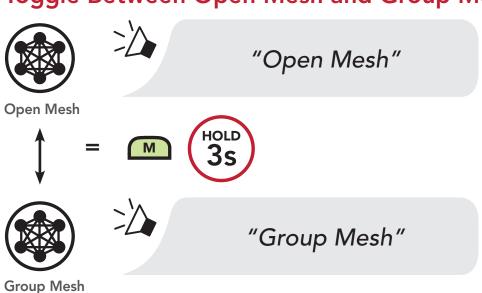

Toggling Open Mesh/Group Mesh 7.7

Users are able to toggle between Open Mesh and Group Mesh without resetting the Mesh. This allows users to keep the Group Mesh Network connection information while in Open Mesh.

Users can toggle to Group Mesh to communicate with participants from the stored Group Mesh Network connection information.

Toggle Between Open Mesh and Group Mesh

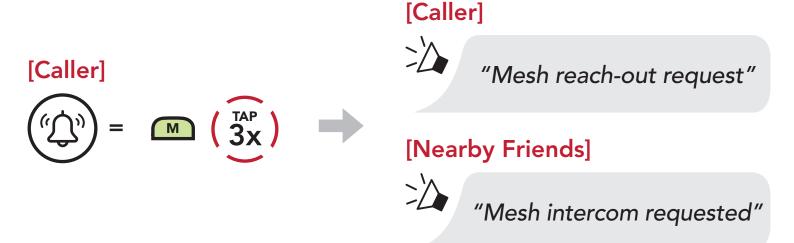

Note: If you have never participated in Group Mesh, you cannot toggle between Open Mesh and Group Mesh. You will hear a voice prompt, "No Group Available."

7.8 Mesh Reach-Out Request

You (caller) can send a request message to turn on the Mesh Intercom to nearby* friends who have it turned off.

- 1. If you want to send or receive a request message, you need to enable Mesh Reach-Out on the Sena Motorcycles App. Please refer to Section 15.2: "Software Configuration Setting."
- 2. While your headset's Mesh Intercom is on, you (caller) send a request message using the headset's Button or the Sena Motorcycles App.

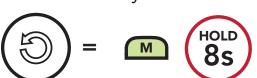

3. Friends who receive the request message need to manually turn on their Mesh Intercom using the headset's Button or the Sena Motorcycles App.

Note:

- *: Up to 100 m (109 yds) in open terrain
- To use the Mesh Reach-Out Request function, you (caller) who sends a request message and the friends who receive the request message must update the headset to the latest firmware version and the app to the latest version.

Reset Mesh 7.9

If a headset in an Open Mesh or Group Mesh resets the Mesh, it will automatically return to Open Mesh (default: channel 1).

8. WAVE INTERCOM

Wave Intercom enables open communication using cellular data. For detailed information, please refer to the Wave Intercom User Guide on sena.com.

Starting Wave Intercom 8.1

To start Wave Intercom, you must open the **WAVE Intercom App** first. Then, double-tap the **Mesh Intercom Button** to join Wave Intercom. You will hear a voice prompt, "Wave Intercom on."

When Wave Intercom is enabled, you will automatically connect with random users in the Wave Zone. The Wave Zone covers a 5-mile radius in North America, and an 8-km radius in Europe.

To end Wave Intercom, single-tap the Mesh Intercom Button. You will hear a voice prompt, "Wave Intercom off."

8.2 Switching between Wave Intercom and Mesh Intercom

You can easily switch between Mesh Intercom and Wave Intercom with a single tap on the Jog Dial.

When switching from Mesh Intercom to Wave Intercom, you will hear a voice prompt, "Mesh Intercom off. Wave Intercom on."

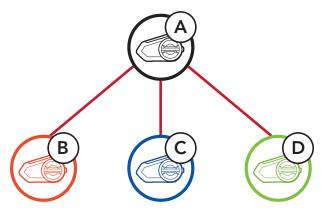

When switching back, you will hear a voice prompt, "Wave Intercom off. Mesh Intercom on."

Note: When the WAVE Intercom App is in use, the Bluetooth Intercom becomes temporarily disabled.

BLUETOOTH INTERCOM

Up to three people can communicate via intercom with the headset simply by pairing their headsets.

Pairing with Intercom Friends

9.1 **Intercom Pairing**

There are two ways to pair the headset.

9.1.1 Using the Smart Intercom Pairing (SIP)

SIP allows you to quickly pair with your friends for intercom communication by scanning the QR code on the Sena Motorcycles **App** without remembering the button operation.

- 1. Pair the mobile phone with the headset.
- 2. Open the **Sena Motorcycles App** and tap **(Smart Intercom** Pairing Menu).
- 3. Scan the **QR** code displayed on your friend (B)'s mobile phone.
 - Your friend (B) can display the QR code on the mobile phone by tapping $\square > \mathbf{QR}$ code $(\square \square)$ on the **Sena Motorcycles App**.

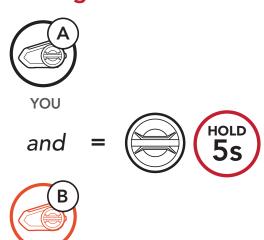

- 4. Tap Save and check that your friend (B) is paired with you (A) correctly.
- 5. Tap Scan () and repeat steps 3-4 to pair with Intercom Friends (C) and **(D)**.

Note: The Smart Intercom Pairing (SIP) is not compatible with Sena products that use **Bluetooth 3.0** or **below**.

9.1.2 Using the Button

1. Press and hold the Jog Dials of two headsets for 5 seconds until you hear a voice prompt, "Intercom pairing."

Pairing Headset A with Headset B

"Intercom pairing"

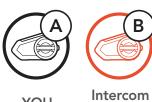

The **50S** will automatically pair with a Sena headset.

2. Repeat step 1 to pair with Intercom Friends C & D.

Last-Come, First-Served

YOU

Friend 1

YOU

Intercom Friend 1

Intercom Friend 2

YOU

Intercom Friend 1

Friend 2

Friend 3

Two-Way Intercom

You can start or end an intercom conversation with an Intercom Friend by tapping the Jog Dial.

1. Tap once for Intercom **Friend 1**.

Start/End with Intercom Friend 1

2. Tap twice for Intercom Friend 2.

Start/End with Intercom Friend 2

3. Tap three times for Intercom **Friend 3**.

Start/End with Intercom Friend 3

9.3 Multi-Way Intercom

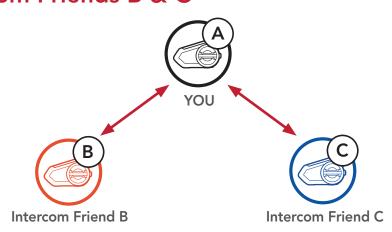

Multi-Way Intercom enables conference-call-style conversations with up to three Intercom Friends at the same time. While Multi-Way Intercom is in progress, mobile phone connection is temporarily disconnected. However, as soon as Multi-Way Intercom terminates, the mobile phone connection will be reestablished.

9.3.1 Starting a Three-Way Intercom Conference

You (A) can have a Three-Way Intercom Conference with two other Intercom Friends (B & C) by establishing two intercom connections simultaneously.

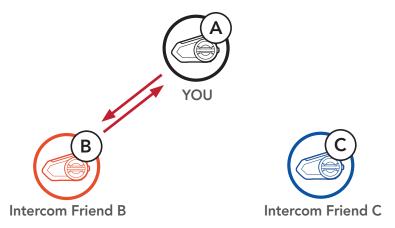

1. Pair your headset (A) with those of two other Intercom Friends (B & C).

Pair with Intercom Friends B & C

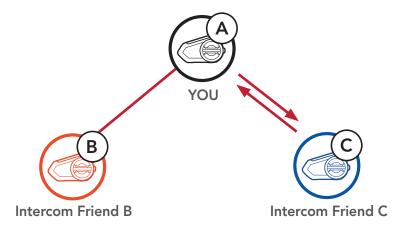

2. Start an intercom conversation with one of the two friends in your intercom group. For example, you (A) may start an intercom conversation with the Intercom Friend (B). Or, Intercom Friend (B) may start an intercom call with you (A).

Starting an Intercom Conversation with Intercom Friend B

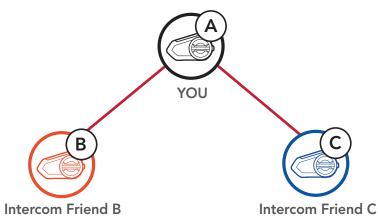

3. Then, you (A) can call the second Intercom Friend (C), or the second Intercom Friend (C) may join the intercom by making an intercom call to you (A).

Starting an Intercom Conversation with Intercom Friend C

4. Now you (A) and two Intercom Friends (B & C) are having a Three-Way Intercom Conference.

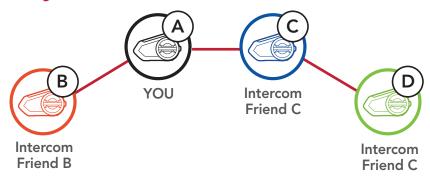

Three-Way Intercom

9.3.2 Starting a Four-Way Intercom Conference

With three Intercom Friends connected, a new participant (D) can make it a Four-Way Intercom Conference by making an intercom call to either (B) or (C).

Starting a Four-Way Intercom

9.3.3 Ending Multi-Way Intercom

- 1. Press and hold the **Jog Dial** for **1 second** until you hear a beep to terminate all intercom connections.
- 2. Tap the **Jog Dial** to disconnect from your first **Intercom Friend**. Double tap the Jog Dial to disconnect from your second Intercom Friend.

Three-Way Conference Phone Call with Intercom 9.4 **Users**

You can have a Three-Way Conference Phone Call by adding an Intercom Friend to the mobile phone conversation.

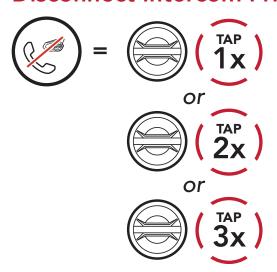

1. During a mobile phone call, tap the Jog Dial once, twice or, three times to invite one of your Intercom Friends to the conversation.

Invite an Intercom Friend into Phone Conference

$$= \bigcirc (\underbrace{1x}_{1x})$$
or
$$\underbrace{2x}_{0x}$$
or
$$\underbrace{TAP}_{2x}$$
or
$$\underbrace{TAP}_{3x}$$

2. To disconnect the intercom during a conference phone call, tap the Jog Dial once, twice or three times.

Disconnect Intercom Friend from Conference

3. To disconnect the mobile phone call during a conference phone call, tap the Phone Button.

End Phone Call from Conference

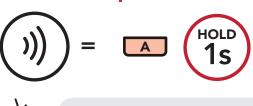

Note: When you have an incoming intercom call during a mobile phone call, you will hear high-toned double beeps.

9.5 **Group Intercom**

Group Intercom allows you to instantly create a Multi-Way Conference Intercom with three of the most recently paired headsets.

- 1. Go through intercom pairing with up to three headsets you want to have **Group Intercom** with.
- 2. Press and hold the Ambient Mode Button for 1 second to begin Group Intercom. The LED will flash green and you will hear a voice prompt, "Group intercom."

Start Group Intercom

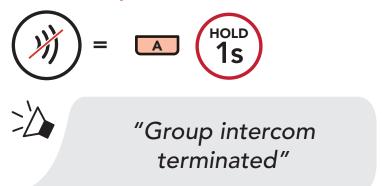

3. When all of the headsets are connected together, everyone will hear a voice prompt, "Group intercom connected."

4. To terminate **Group Intercom**, press and hold the **Ambient Mode** Button for 1 second during Group Intercom. You will hear a voice prompt, "Group intercom terminated."

End Group Intercom

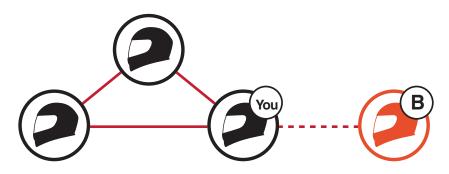

9.6 Mesh Intercom Conference with Bluetooth **Intercom Participant**

Users can use the existing Bluetooth Intercom and Mesh Intercom functions at the same time. When doing so, it is recommended to communicate with any non-Mesh Intercom Sena headsets via the Bluetooth Intercom connection and use Mesh Intercom between Sena headsets that support both Bluetooth Intercom and Mesh Intercom.

1. Tap the **Mesh Intercom Button** to turn on **Mesh Intercom**.

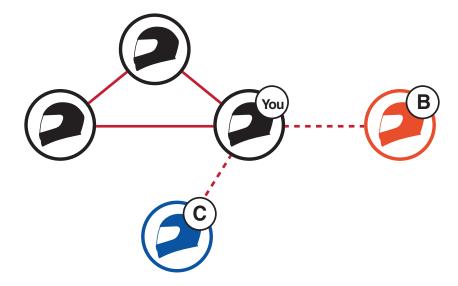

2. When you tap the **Jog Dial** to start a Two-Way Intercom conversation with the first Bluetooth intercom friend (B), your Bluetooth intercom friend (B) will join Mesh Intercom.

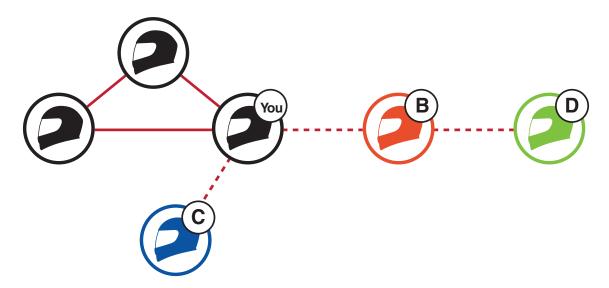

Mesh Intercom + Two-Way Intercom

3. You can have up to three Bluetooth intercom friends join the Mesh Intercom. For detailed information on Bluetooth Multi-Way Intercom, please refer to Section 9.3: "Multi-Way Intercom." The audio quality will be reduced if you connect to two or more Bluetooth intercom friends while using Mesh Intercom.

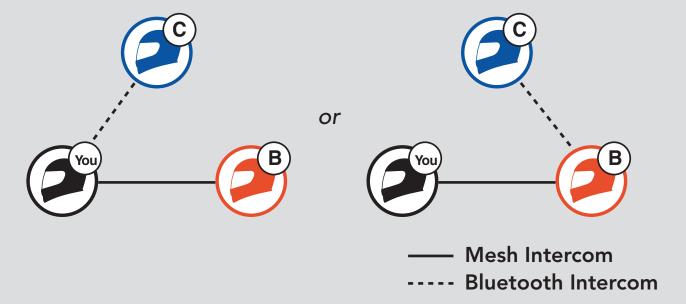

Mesh Intercom + Three-Way Intercom

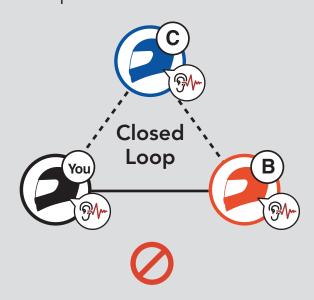

Mesh Intercom + Four-Way Intercom

Note:

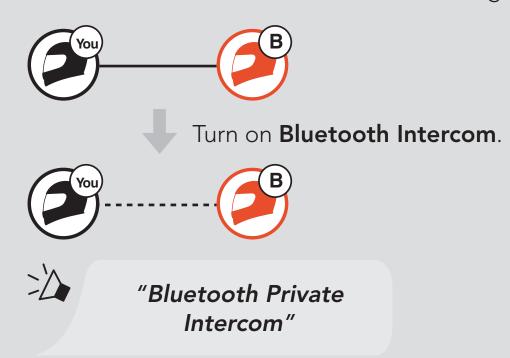

• When adding Bluetooth intercom friends to a Mesh Intercom, be careful not to create a closed loop. To prevent a closed loop from being created, Bluetooth intercom friend (C) must be connected via Bluetooth Intercom to only one user, you or B, using Mesh Intercom.

If Bluetooth intercom friend (C) connects with Bluetooth Intercom to You and B who are using Mesh Intercom, a closed loop will be created and they will experience severe noise.

If You start a **Bluetooth Intercom** conversation with Intercom friend (B) during Mesh Intercom with Intercom friend (B), You and Intercom friend (B) will hear the voice prompt, "Bluetooth Private Intercom." You and Intercom friend (B) can only communicate via Bluetooth Private Intercom to avoid creating a closed loop.

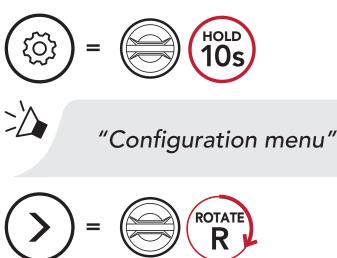

While using Bluetooth Private Intercom, if You or Intercom friend (B) turn off Bluetooth Private Intercom, Mesh Intercom will turn on for You and Intercom friend (B). Or, if You or Intercom friend (B) turn on Mesh Intercom, Mesh Intercom will turn on for You and Intercom friend (B) and Bluetooth Private Intercom will automatically turn off.

Universal Intercom 9.7

Universal Intercom allows you to have intercom conversations with users of non-Sena Bluetooth headsets. You can pair your headset with only one non-Sena headset at a time. The intercom distance depends on the performance of the Bluetooth headset to which it is connected. When a non-Sena Bluetooth headset is paired with the Sena headset, if another Bluetooth device is paired via Second Mobile Phone Pairing, it will be disconnected.

1. Execute Universal Intercom in the Headset Configuration Menu.

Access Universal Intercom in the Configuration Menu

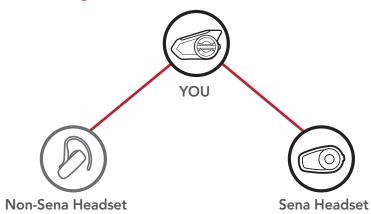

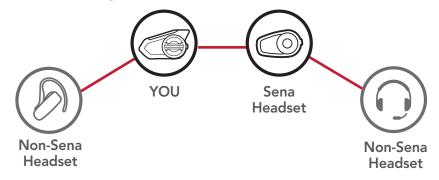

- 2. Put the non-Sena Bluetooth headset in Pairing Mode. The headset will automatically pair with a non-Sena Bluetooth headset.
- 3. You can have **Two-Way Intercom** or **Multi-Way Intercom** communication with up to three Intercom Friends using non-Sena headsets by following the procedures described below.

Example of a Three-Way Universal Intercom

Example of a Four-Way Universal Intercom

Note: Some non-Sena headsets may not support Multi-Way Universal Intercom.

Mesh Intercom Conference with Two-way Universal 9.8 **Intercom Participant**

Users can use the existing Two-way Universal Intercom and Mesh **Intercom** function at the same time. In this case, it is recommended to communicate with non-Sena headset via Two-way Universal Intercom connection and use Mesh Intercom between 50S headsets.

A user who is in **Open Mesh** or **Group Mesh** when using **Mesh** Intercom is able to include one Universal Intercom friend. You can start a Two-way Universal Intercom conversation with your Universal Intercom Friend to include it in the Mesh.

10. USING THE FM RADIO

FM Radio On/Off 10.1

FM Radio On

"FM on"

FM Radio Off

"FM off"

Seek and Save Radio Stations 10.2

The "Seek" feature searches for radio stations.

1. Search for radio stations.

Seek Stations Forward

Seek Stations Backward

2. Save the current station.

Enter Preset Selection Mode

"Preset (#)"

3. Navigate through the preset numbers that you want to store.

Navigate Forward/Backward Through Preset Stations

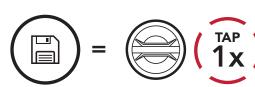

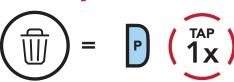

4. Save the station in the preset number you choose or delete the station from memory.

Save Station to the **Preset Number**

Delete Station from Memory

Scan and Save Radio Stations 10.3

The "Scan" function automatically searches for radio stations, starting with the current station's frequency, then up from there.

1. Scan for stations.

Start Scanning

$$\bigcirc = \bigcirc (\underbrace{2x}^{TAP})$$

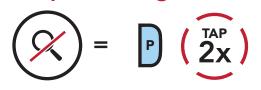

- 2. The Sena tuner pauses at each station it finds for 8 seconds before moving to the next.
- 3. Save the current station. The station will be saved as the next preset number.

Save the Current Station

4. Stop scanning.

Stop scanning

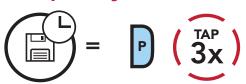

10.4 **Temporary Station Preset**

The **Temporary Preset** feature automatically finds and saves the nearest 10 radio stations without changing your existing preset stations.

1. Automatically find and save 10 stations.

Temporary Stations

2. The temporary preset stations will be cleared when the headset reboots.

10.5 **Navigating Preset Stations**

Using the methods above, up to 10 radio stations can be stored. You can navigate through the saved stations.

Navigate through Preset Stations

Note: You can use the Royal Enfield Device Manager or the Sena Motorcycles App to save the preset stations.

Region Selection 10.6

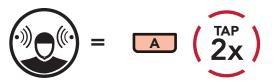

You can select the proper FM frequency range for your location from the Royal Enfield Device Manager or the Sena Motorcycles App. Using the region setting, you can optimize the seek function to avoid unnecessary frequency ranges.

Region	Frequency range	Step
Worldwide	76.0 ~ 108.0 MHz	± 100 kHz
North America, South America and Australia	87.5 ~ 107.9 MHz	± 200 kHz
Asia and Europe	87.5 ~ 108.0 MHz	± 100 kHz
Japan	76.0 ~ 95.0 MHz	± 100 kHz

11. AMBIENT MODE

You can hear the ambient sound outside of your helmet by activating the Ambient Mode.

Start/Stop Ambient Mode

Note: The Ambient Mode has higher priority than mobile phone, so you cannot listen to music, or have an intercom conversation if the Ambient Mode is activated.

12. VOICE COMMAND

The Voice Command of the headset allows you to operate certain operations by simply using your voice. You can control the headset completely hands-free using the voice recognition. Multi-language Voice Command supports English, French, German, Spanish, Italian, Chinese, Japanese, and Russian.

Speak a Voice Command List

Mode Status	Function	Voice Command
Standby/ Bluetooth	Check battery	"Hey Sena, Check Battery"
	Volume Up	"Hey Sena, Volume Up"
	Volume Down	"Hey Sena, Volume Down"
Intercom/Mesh Intercom/FM	Phone Pairing	"Hey Sena, Phone Pairing"
Radio/Music	Bluetooth Intercom Pairing	"Hey Sena, Pairing Intercom"
	Start/End each Bluetooth Intercom	"Hey Sena, Intercom [one, two, three]"
Standby/ Bluetooth Intercom/FM Radio/Music	Turn on Mesh Intercom	"Hey Sena, Mesh On"
Mesh Intercom	Turn off Mesh Intercom	"Hey Sena, Mesh Off"
	Mesh Grouping	"Hey Sena, Mesh Grouping"
	Switch to Open Mesh	"Hey Sena, Open Mesh"
	Switch to Group Mesh	"Hey Sena, Group Mesh"
	End the Bluetooth intercom and Mesh intercom	"Hey Sena, End intercom"
Standby/ Bluetooth Intercom/Mesh Intercom	Play Music	"Hey Sena, Play Music"
Standby/ Intercom/Mesh Intercom/Music	Turn on FM radio	"Hey Sena, FM Radio On"

Mode Status	Function	Voice Command
Music/FM Radio	FM - Next PresetMusic - Next Track	"Hey Sena, Next"
	FM - Previous PresetMusic - Previous Track	"Hey Sena, Previous"
Music	Pause Music	"Hey Sena, Stop Music"
FM Radio	Turn off FM Radio	"Hey Sena, FM Radio Off"
Answer an Incoming Call		"Answer"
Ignore an Incoming Call		"Ignore"

Note:

- You can set a language to another language by using the Language feature on the Sena Motorcycles App.
- If you set a language that does not support voice commands, the voice command will work only with English commands.
- You can see the another language's voice command list on the Sena Motorcycles App.
- Voice command performance may vary based on the environmental conditions including riding speed, helmet type and ambient noise. To improve the performance, minimize wind noise on the microphone by using a large microphone sponge and closing the visor.

GoPro VOICE COMMAND

Before using GoPro Voice Command, you will need to pair with a compatible GoPro camera for the first time.

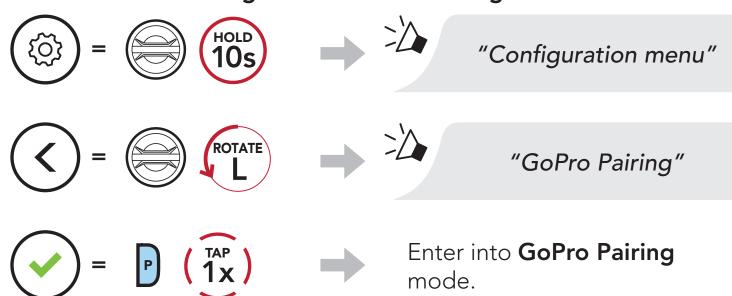

- Compatible camera model: **HERO8 Black*** and later
- * HERO8 Black was released on Sep 24, 2019.

Connect GoPro Camera 13.1

1. Select the [Remote] menu on your GoPro camera to enter pairing mode.

(Refer to the User's manual of the GoPro camera you want to use.)

2. Execute GoPro Pairing in the Headset Configuration Menu.

3. The headset will automatically pair with your **GoPro** camera.

13.2 **Using GoPro Voice Commands**

The GoPro Voice Command of the headset allows you to operate certain operations by simply using your voice. You can control the GoPro camera completely hands-free using the voice recognition. Multilanguage GoPro Voice Command supports English, French, German, Spanish, Italian, Chinese, Japanese, and Russian.

Speak a GoPro Voice Command List

Mode Status	Function	Voice Command
Standby/ Bluetooth Intercom/ Mesh Intercom/ FM Radio/ Music	Turn on camera	"GoPro, Camera on"
	Turn off camera	"GoPro, Camera off"
	Check camera status and battery	"GoPro, Check camera"
	Start Recording mode	"GoPro, Start recording"
	Stop Recording mode / Stop time-lapse mode	"GoPro, Stop recording"
	Start capturing with the last time-lapse mode you used	"GoPro, Start time-lapse"
	Add a HiLight Tag to your video during recording	"GoPro, HiLight"
	Take a single photo	"GoPro, Take a photo"

Note:

- You can set a language to another language by using the Language feature on the Sena Motorcycles App.
- If you set a language that does not support GoPro voice commands, the voice command will work only with English commands.
- You can see the another language's GoPro voice command list on the Sena Motorcycles App.
- GoPro voice command performance may vary based on the environmental conditions. To improve the performance, minimize wind noise on the microphone by using a large microphone sponge and closing the visor.

14. FUNCTION PRIORITY AND FIRMWARE UPDATE

14.1 **Function Priority**

(highest) Ambient mode

Mobile phone

Mesh intercom/Bluetooth intercom

Music sharing via Bluetooth stereo music

FM radio

(lowest) Bluetooth stereo music

A lower-priority function gets interrupted by a higher-priority function. For example, stereo music will be interrupted by an Intercom Conversation; an Intercom Conversation will be interrupted by an incoming mobile phone call.

14.2 Firmware Update

14.2.1 WiFi Charging Cable

You can update firmware using the WiFi Charging Cable.

You can automatically install any available firmware updates to your headset via your wireless network.

Please refer to the WiFi Charging Cable User Guide.

14.2.2 Using the Royal Enfield Device Manager

You can update firmware using the Royal Enfield Device Manager. The USB Power & Data Cable (USB-C) must be connected to your PC to update firmware using the Royal Enfield Device Manager.

Note:

- A USB Power & Data Cable (USB-C) is not included in the package.
- Do not connect the WiFi Charging Cable to your PC to use the Royal Enfield Device Manager.

Click Here to Visit https://oem.sena.com/royal-enfield/

15. CONFIGURATION SETTING

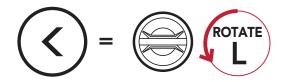

Headset Configuration Setting 15.1

Access the Configuration Menu

Execute Menu Options

Headset Configuration Menu

Voice Configuration Menu	Tap the Phone Button	
Delete All Pairings	Execute	
Remote Control Pairing	Execute	
Universal Intercom Pairing	Execute	
GoPro Pairing	Execute	
Exit	Execute	

Delete All Pairings 15.1.1

Delete All Bluetooth Pairing Information stored in the headset.

15.1.2 Remote Control Pairing

You can remotely control the headset using Sena Remote Control devices (sold separately).

- 1. Turn on the headset and the Remote Control device.
- 2. Execute **Remote Control Pairing**.
- 3. Enter pairing mode in the Remote Control device. The headset will automatically connect with the Remote Control device in pairing mode.

Software Configuration Setting

You can change the settings of the headset through the Royal Enfield Device Manager or the Sena Motorcycles App.

Sena Motorcycles

Royal Enfield Device Manager

15.2.1 **Speed Dial**

Assign phone numbers for speed dialing to make a phone call quickly.

15.2.2 Channel Setting (Default: channel 1)

If the Open Mesh communication experiences interference because other groups are also using the channel 1 (default), change the channel. You can select one of 1 to 6 channels.

15.2.3 Language

You can select the device language. The selected language is maintained even when the headset is rebooted.

15.2.4 Mesh Reach-Out (Default: Disable)

When the Mesh Reach-Out is enabled, a Mesh Reach-Out request message can be sent or received. If the Mesh Reach-Out is disabled, a Mesh Reach-Out request message cannot be sent or received.

15.2.5 Equalizer (Default: Music Balance)

Increase or decrease the decibel level of different frequency ranges of audio.

- Music Balance will adjust frequency response that gives the most natural balance between lows, mids, and highs.
- Music Enhanced will lower midrange frequencies slightly.
- Voice will increase midrange frequencies of the human voice and cut environmental noise for better clarity with voice communication.
- Bass Boost will increase the bass range of audio (130 Hz and below).
- Treble Boost will increase the high range of audio (6 kHz and above).

15.2.6 Audio Boost (Default: Enable)

Audio Boost increases the overall maximum volume. If Audio Boost is enabled, Equalizer will not be effective at the maximum volume and only work below the maximum volume. If Audio Boost is disabled, Equalizer will work across all volume ranges.

15.2.7 VOX Phone (Default: Enable)

If this feature is enabled, you can answer incoming calls by voice. When you hear a ringtone for an incoming call, you can answer the phone by saying a word such as "Hello" loudly or by blowing air into the microphone. VOX Phone is temporarily disabled if you are connected to intercom. If this feature is disabled, you have to tap the Jog Dial or the **Phone Button** to answer an incoming call.

15.2.8 VOX Intercom (Default: Disable)

If **VOX Intercom** is enabled, you can initiate an intercom conversation with the last connected intercom friend by voice. When you want to start intercom, say a word such as "Hello" loudly or blow air into the microphone. If you start an intercom conversation by voice, the intercom terminates automatically when you and your intercom friend remain silent for 20 seconds. However, if you manually start an intercom conversation by tapping the Jog Dial, you have to terminate the intercom conversation manually. However, if you start the intercom by voice and end it manually by tapping the Jog Dial, you will not be able to start intercom by voice temporarily. In this case, you have to tap the Jog Dial to restart the intercom. This is to prevent repeated unintentional intercom connections by strong wind noise. After rebooting the headset, you can start the intercom by voice again.

15.2.9 VOX Sensitivity (Default: 3)

Vox Sensitivity can adjust the sensitivity of Vox Phone and Vox Intercom. Level 5 is the highest sensitivity setting and level 1 is the lowest.

15.2.10 Bluetooth Intercom Audio Multitasking (Default: Disabled)

Audio Multitasking (Bluetooth Intercom Audio Multitasking and Mesh Intercom Audio Multitasking) allows you to have an intercom conversation while simultaneously listening to music, FM radio, or GPS instructions. The overlaid audio is played in the background with reduced volume whenever there is an intercom conversation and will return to normal volume once the conversation is finished.

The **Mesh Intercom Audio Multitasking** feature is always **on**.

Note:

- For Bluetooth Intercom Audio Multitasking to work properly, you need to power the headset off and on. Please restart the headset
- Bluetooth Intercom Audio Multitasking will be activated during two-way intercom conversations with a headset that also supports this feature.
- Some GPS devices may not support this feature.
- The Audio Multitasking feature can be configured through the Intercom-Audio Overlay Sensitivity and the Audio Overlay Volume Management settings.

15.2.11 Intercom-Audio Overlay Sensitivity (Default: 3)

The music, FM radio and GPS volume will be lowered to play in the background if you talk over the intercom while the overlaid audio is playing. You can adjust the intercom sensitivity to activate this background audio mode. Level 1 has the lowest sensitivity and level 5 has the highest sensitivity.

Note: If your voice is not louder than the sensitivity of the selected level, the overlaid audio will not be lowered.

15.2.12 Audio Overlay Volume Management (Default: Disable)

The music, FM radio and GPS overlaid audio reduces in volume whenever there is an ongoing intercom conversation. If Audio Overlay Volume Management is enabled, the volume level of the overlaid audio will not be reduced during an intercom conversation.

15.2.13 HD Intercom (Default: Enable)

HD Intercom enhances the two-way intercom audio from normal quality to HD quality. HD Intercom will become temporarily disabled when you enter into a multi-way intercom. If this feature is disabled, the two-way intercom audio will change to normal quality.

Note:

- The intercom distance of **HD Intercom** is relatively shorter than that of normal intercom.
- HD Intercom will become disabled temporarily when Bluetooth Intercom Audio Multitasking is enabled.

15.2.14 HD Voice (Default: Enable)

HD Voice allows you to communicate in high-definition during phone calls. This feature increases the quality so that the audio will be crisp and clear during phone call conversations.

If this feature is enabled, incoming phone calls will interrupt intercom conversations and audio from the SR10 will not be heard during intercom conversations. Three-Way Conference Phone Call with Intercom Participant will not be available if **HD Voice** is enabled.

Note:

- Refer to the manufacturer of your Bluetooth device that will be connected to the headset to see if it supports HD Voice.
- HD Voice is active only when Bluetooth Intercom Audio Multitasking is disabled.

15.2.15 Smart Volume Control (Default: Disable)

Enabling Smart Volume Control automatically changes the level of the speaker volume based on the level of the environment noise. You can enable it by setting the sensitivity to low, medium or high.

15.2.16 Sidetone (Default: Disable)

Sidetone is audible feedback of your own voice. It helps you to naturally speak at the correct level according to varying helmet noise conditions. If this feature is enabled, you can hear what you are speaking during an intercom conversation or a phone call.

15.2.17 Voice Assistant (Default: Enable)

If Voice Assistant is enabled, you can wake up Siri or Google Assistant using a voice command, such as "Hey Siri" or "Hey Google." If you do not want to wake up Siri or Google Assistant with your voice, disable this teature.

15.2.18 Voice Prompt (Default: Enable)

You can disable Voice Prompts by software configuration settings, but the following voice prompts are always on.

- Headset configuration settings menu, battery level indicator, speed dial, FM radio functions

15.2.19 RDS AF Setting (Default: Disable)

Radio Data System (RDS) Alternative Frequency (AF) Setting allows a receiver to re-tune to the second frequency location when the first signal becomes too weak. With RDS AF enabled on the receiver, a radio station with more than one frequency can be used.

15.2.20 FM Station Guide (Default: Enable)

When FM Station Guide is enabled, FM station frequencies are given by voice prompts as you select preset stations. When FM Station Guide is disabled, the voice prompts on FM station frequencies will not be given as you select preset stations.

15.2.21 Advanced Noise Control™ (Default: Enable)

When Advanced Noise Control is enabled, the background noise is reduced during an intercom conversation. When it is disabled, the background noise is mixed with your voice during intercom.

TROUBLESHOOTING 16.

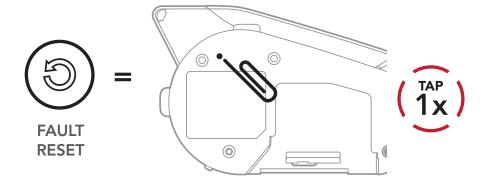

Please visit https://oem.sena.com/royal-enfield/ for answers to frequently asked questions. This detailed online FAQ section deals with troubleshooting, illustrates case studies and contains tips on using the headset.

Click Here to Visit https://oem.sena.com/royal-enfield/

Fault Reset 16.1

When the headset is not working properly, you can easily reset the unit:

- 1. Locate the Pinhole Fault Reset Button below on the back of the main unit.
- 2. Gently insert a paperclip into the hole and tap the Pinhole Fault Reset Button with light pressure.

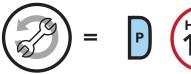

3. The headset will shut down.

Note: Fault Reset will not restore the headset to factory default settings.

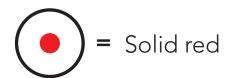

16.2 **Factory Reset**

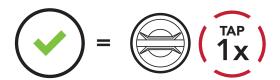

To erase all of your settings and start fresh, the headset can be restored to factory default settings using the Factory Reset feature.

"Factory reset"

Note: If you press the Phone Button or do not press the Jog Dial within 5 seconds, the reset attempt is canceled and the headset returns to standby mode. You will hear a voice prompt saying "Canceled."
